BILLING CYCLE FOR IMPERVIOUS ONLY PROPERTIES

Impervious only (IO) properties are properties that do not currently have metered water/sewer service (for example, parking lots) and may require the creation of new accounts.

DC Water bills IO properties with *three* or more ERUs monthly, and those with less every six months.

Customers who are billed for more than one (1) property and who participate in DC Water's group billing program will be billed monthly for all properties.

DC WATER PRETREATMENT FEES

Effective date: October 1, 2012

Waste Hauling - Annual Fee per Vehicle

Vehicles 0 - 49 gallons	\$160.00
Vehicles 50 - 799 gallons	\$2,265.00
Vehicles 800 - 1,499 gallons	\$6,170.00

Industrial User Permitting Fee

Permit Initial Fee	\$2,000.00
Permit Renewal Fee	\$600.00

Industrial User Annual Compliance Fees

Significant or Non-Significant Categorical Industrial User

1 Outfall	\$2,500.00
2 or more Outfalls	\$3,500.00

Significant Non-Categorical Industrial User

1 Outfall	\$2,500.00
2 or more Outfalls	\$3,500.00

Non-Significant Non-Categorical User

1 Outfall	\$550.00
2 or more Outfalls	\$700.00

OVERVIEW OF THE IMPERVIOUS SURFACE AREA CHARGE

HISTORY OF THE IAC

The charge was previously embedded in the sewer rate. On May 1, 2009, DC Water unbundled the sewer rate and listed the IAC as a separate line item on the customer bill.

WHY IS THE IAC NECESSARY?

DC Water implemented the IAC charge in 2009 to recover the cost of the \$2.6 billion federally-mandated Combined Sewer Overflow Long Term Control Plan (CSO LTCP) to control overflow into the local waterways. This includes building large metro-sized tunnels to store overflow until it can be treated at the Blue Plains Wastewater Treatment Plant.

IAC RATE STRUCTURE

Non-Residential Customers: The fee is based upon the total amount of impervious surface area at a property. The total amount of impervious area is converted into ERUs and reduced to the nearest 100 square feet.

Residential Customers: DC Water has adopted a six-tier rate structure for residential customers. Previously, these customers paid a flat fee. Residential customers ONLY include:

- ❑ Condominium or apartment units where each unit is served by a separate line and is individually metered;
- ❑ Multifamily structures of less than four units where all units are served by a single service line that is master-metered; and
- ❑ Single-family dwellings.

DC WATER'S SIX-TIER RESIDENTIAL RATE STRUCTURE FOR THE IAC							
Tier	Size of Impervious Area (Square Feet)	Equivalent Residential Unit (ERU)	FY 2013 ERU Rate	Monthly Cost	FY 14 ERU Rate (Eff. 10/1)	Monthly Cost	# of properties
Tier 1	100 - 600	0.6	\$9.57	\$5.74	\$12.77	\$7.66	18,563
Tier 2	700 - 2000	1.0	\$9.57	\$9.57	\$12.77	\$12.77	77,514
Tier 3	2,100 - 3,000	2.4	\$9.57	\$22.97	\$12.77	\$30.65	5,736
Tier 4	3,100 - 7,000	3.8	\$9.57	\$36.37	\$12.77	\$48.53	2,499
Tier 5	7,100 - 11000	8.6	\$9.57	\$82.30	\$12.77	\$109.82	124
Tier 6	11,100 and more	13.5	\$9.57	\$129.20	\$12.77	\$172.39	47

Source: 21 DCMR 4101.3, 4104.1; DC Water Board of Directors September 2, 2010 Resolution adopting FY 2011 rates. Note, the number of properties in each tier may have changed since FY 2011.

PLANNING FOR THE FUTURE: PROJECTED INCREASES TO WATER & SEWER RATES

Source: DC WATER Operating Budgets, Revised 2013 Approved FY 2014, Section IV Rates and Revenues, page IV-14.

PROJECTED CHANGES TO THE IAC: FY 2014 -2021

Source: DC Water Operating Budgets FY Revised 2013 Approved FY 2014, Section IV Rates and Revenues, page IV-15 (“The projected charges displayed in the chart above are primarily driven by anticipated debt service costs necessary to support the twenty year \$2.6 billion Clean Rivers Project, which includes the federally mandated CSO-LTCP and the nine-minimum controls program.”)

POTENTIAL IMPACT OF CSO LONG-TERM CONTROL PLAN ON RATES

CSO LTCP Spending by Year

In December 2004, the DC Water Board reached an agreement with the federal government on the CSO LTCP and entered into a related consent decree. Projected disbursements by fiscal year for the LTCP portion are shown in the chart above and are the drivers for changes in the Clean Rivers IAC over the ten-year plan. Wholesale customers contribute 7.1 percent to the Clean Rivers Project. To mitigate impacts, DC Water continues to look for federal support for this program. As of September 30, 2012, \$168.6 million has been received through federal appropriations. Lifetime capital costs for the plan (exclusive of the nine – minimum controls program) total approximately \$2.4 billion, and this year’s proposed ten-year plan includes \$1.1 billion of projected Clean Rivers Project disbursements.

Source: DC Water Operating Budgets Revised FY 2013 Approved FY 2014, Section IV Rates and Revenues, page IV-27.

FUTURE PROPOSED INCREASES TO IAC:
SAMPLE BILL: Building with 50,000/sq. ft. of impervious surface area.

FY 2013	October 1, 2012 (approved)	50 x \$9.57	=	\$ 478.50
FY 2014	October 1, 2013 (proposed)	50 x \$12.77	=	\$ 638.50
FY 2015	October 1, 2014	50 x \$16.79	=	\$ 839.50
FY 2016	October 1, 2015	50 x \$20.68	=	\$1,034.00
FY 2017	October 1, 2016	50 x \$23.12	=	\$1,156.00
FY 2018	October 1, 2017	50 x \$24.52	=	\$1,226.00
FY 2019	October 1, 2018	50 x \$26.08	=	\$1,304.00
FY 2020	October 1, 2019	50 x \$28.32	=	\$1,416.00
FY 2021	October 1, 2020	50 x \$30.67	=	\$1,533.50

DC WATER IAC DISCOUNT PROGRAM

DC Official Code § 34-2202.16a

Low-impact design incentive program and fee discounts

- a) Within one year of March 25, 2009, the Authority shall establish, together with the District Department of the Environment ("DDOE"), a low-impact design incentive program within the DDOE, to reduce the surface area that either prevents or retards the entry of water into the ground as occurring under natural conditions, or that causes water to run off the surface in greater quantities or at an increased rate of flow, relative to the flow present under natural conditions.
- b) The Authority and the DDOE will continue to collect and document the effects of the low-impact design techniques throughout the District on reducing stormwater runoff and the possible implications of how proven, long-term reductions in stormwater runoff may be used to renegotiate the consent decree and reduce the cost and size of the Long-Term Control Plan.
- c) Impervious surface fee discounts approved by the Authority shall be retroactive to no earlier than the date of the implementation of the impervious surface fee. A property owner may not qualify for an impervious surface fee discount until the stormwater management measures for which the property owner seeks a discount are demonstrated to be fully functional.

OVERVIEW – PROPOSED IAC DISCOUNT PROGRAM

ELIGIBILITY --- THE BASICS

DC Water customer that is paying the IAC and current on DC Water payments.

Satisfy DC Department of the Environment (DDOE) requirements to receive a stormwater fee discount.

Uncertainty: The discount program will be subject to the availability of funds and maximum budget limits established by DC Water's budget appropriations.

What if I already have installed a stormwater retention practice in my building? While District law also requires retroactive application of the discount to May 1, 2009, DC Water's proposed rules explicitly provide that the discount will only be retroactive to the effective date of the final rules or the date from which DDOE calculates the stormwater fee discount, whichever is later.

Maximum allowable discount: 4% during the first year of the discount program. Credit amount may change in subsequent years as it will be subject to budget appropriations.

DISCOUNT PERIOD, RECERTIFICATION AND MORE

Initial application date: Customers will receive an IAC Discount on the effective date of final rules after DC Water receives DDOE's stormwater fee discount approval for the property.

Application/Renewal: DDOE will administer the application and renewal process.

Discount Period: The discount will expire on the first of:

- Expiration of the DDOE stormwater fee discount (three years);
- DDOE's revocation of the discount;
- Sale or transfer of the property to a new owner; or
- Three years after the effective date of the proposed rules.

Billing: DC Water will apply the IAC Discount towards a customer's bill based on DDOE's approval of a stormwater fee discount. The IAC discount will be applied as a recurring discount beginning with the billing period that follows DC Water's receipt and processing of DDOE's stormwater fee discount approval. For customers billed on a semi-annual basis, the discount will appear on their next bill normally in March and September.

Denial, revocation, adjustments to discount, challenging discount determination: If DDOE determines that the stormwater fee discount will be reduced, DC Water will reduce the IAC discount proportionately upon receipt of DDOE's decision.

Calculating the IAC Incentive Discount

(1) DDOE will send DC Water the DDOE approved maximum volume of stormwater runoff retained (in Equivalent Residential Units (ERUs)) by an approved and eligible BMP(s) during a one and two tenths inch (1.2 in.) rainfall event;

(2) Multiply the number of ERUs of step “(1)” by the maximum allowable discount percentage; and

(3) Multiply the step “(2)” result by the IAC per ERU.

(4) Calculated IAC discount will be applied to each IAC billed.

ADDITIONAL INFORMATION DC WATER RATES

General Overview of Rates: [DC Water Overview of Customer Rates](#)

Calculating the IAC for a Commercial Property:

1. Amount of impervious area at a property/1000 Square feet (1 ERU) = X
2. Multiply X by \$9.57 = IAC
3. **Example** - using 50,000 square feet of impervious surface area
 $50,000/1000 = 50 \times \$9.57 = \$478.50/\text{month}$ impervious surface area charge

DC DEPARTMENT OF THE ENVIRONMENT (DDOE) STORM WATER FEE

CURRENT DC STORMWATER FEE

As of Nov. 1, 2010, the stormwater fee is \$2.67/ERU.

HISTORY OF THE STORMWATER FEE

Previously, the stormwater fee was based on a percentage of the water and sewer charges.

WHY IS THE STORMWATER FEE NECESSARY?

In May 2009, DDOE began assessing the stormwater fee based on the amount of impervious surface area at a property. At that time, DDOE established a rate of \$2.57/ERU. DDOE increased the rate on November 1, 2010 to the current rate of \$2.67/ERU.

DDOE is responsible for ensuring the District's compliance with the District's separate storm sewer system (MS-4) permit, which accounts for roughly two-thirds of the city's storm water control infrastructure. DDOE periodically adjusts the stormwater fee to generate any additional revenue needed to meet increased federal requirements for controlling stormwater pollution. The fee generates approximately \$13.2 million.

Source: 21 DCMR 556.5; DDOE October 29, 2010 Notice of Final Rulemaking (establishing \$2.67/ERU rate); DDOE April 24, 2009 Notice of Final Rulemaking (establishing \$2.57/ERU rate); [DDOE Website–Stormwater Management Division–Stormwater Management History](#).

STORMWATER FEE RATE STRUCTURE

Non-Residential Customers: The fee is based upon the total amount of impervious surface area at a property. The total amount of impervious area will be converted into ERUs, reduced to the nearest 100 square feet.

Residential Customers: DDOE has adopted a six-tier rate structure for assessing residential customers the stormwater fee.

HOW DOES DDOE DEFINE RESIDENTIAL CUSTOMERS?

21 DCMR 556.2 A residential customer means a single-family dwelling used for domestic purposes, a condominium or apartment unit where each unit is served by a separate service line and is individually metered and the unit is used for domestic purposes, or a multifamily structure of less than four apartment units where all the units are served by a single service line that is master metered.

Residential customers shall be assessed ERUs for the square feet of impervious surface on the property, as follows:

- (a) 0.6 ERUs for 100 to 600 square feet of impervious surface;
- (b) 1.0 ERU for 700 to 2,000 square feet of impervious surface;
- (c) 2.4 ERUs for 2,100 to 3,000 square feet of impervious surface;
- (d) 3.8 ERUs for 3,100 to 7,000 square feet of impervious surface;
- (e) 8.6 ERUs for 7,100 to 11,000 square feet of impervious surface; and
- (f) 13.5 ERUs for 11,100 square feet or more of impervious surface

Source: 21 DCMR 556.2.

**DC STORMWATER FEE:
PROJECTED INCREASES TO THE RATE**

NO INCREASE IN FY 2014.

DC OFFICIAL CODE § 8-152.03 STORMWATER USER FEE DISCOUNT PROGRAM

- (a) Within one year of the enactment of an impervious area stormwater user fee by DC WASA, the Mayor shall establish a Stormwater User Fee Discount Program to be coordinated between DC WASA and the Administration.
- (b) The program shall allow property owners who implement measures to manage stormwater runoff from their properties to receive a discount on the stormwater user fee assessed to them under § 34-2202.16.
- (c) Stormwater user fee discounts approved by the Mayor shall be retroactive to no earlier than the date of the implementation of the impervious area stormwater fee. A property owner may not qualify for a stormwater user fee discount until the stormwater management measures for which they seek a discount are demonstrated to be fully functional.
- (d) Any discount earned under this section will be revocable upon a finding by the Mayor of non-performance. Upon a finding of non-performance, the Mayor may require reimbursement of any portion of fees discounted to date.
- (e) Findings of non-performance by the Mayor may be appealed by an applicant pursuant to rules established by the Mayor.
- (f) Failure to reimburse may result in a lien being placed upon the property without further notice to the owner. The Mayor may enforce the lien in the same manner as in § 34-2407.02.

OVERVIEW OF DDOE'S PROPOSED STORMWATER FEE DISCOUNT REGULATIONS

ELIGIBILITY --- THE BASICS

DC Water customer and property owner that: (1) is paying the stormwater fee and current on all payments; and (2) installed a Best Management Practice (BMP).

- ❑ **Best Management Practice** – a structural device or non-structural practice that minimizes the impact of stormwater runoff on receiving water bodies and other environmental resources, especially by reducing runoff volume and the pollutant loads carried in that runoff.

MAXIMUM ALLOWABLE DISCOUNT 55%

Initial application date:

- ❑ **Most customers (including AOBA members):** Can apply as of the effective date of the final regulations except for those filing Simplified Application.
- ❑ **Simplified application:** Begin filing one year after effective date of final regulations. The application can be filed for properties with a BMP or multiple BMPs that manage a cumulative impervious area of 2,000 sq. ft. or less)

What if I already have installed a stormwater retention practice in my building? District law also requires retroactive application of the discount to May 1, 2009. The approved credit will be applied as an offset to stormwater fee until the retroactive discount is zero.

- ❑ **Eligibility Standards:** To receive a retroactive discount, the customer must: (1) be eligible to receive a discount; (2) document installation date; (3) prove the practice is functional; (4) allow for DDOE inspection of the BMP; and (5) apply within one year of the date the customer becomes eligible to apply.

APPLICATION PROCESS

Documentation (unless submitting Simplified Application): Submit an application (paper or electronic) which describes the design and performance of the BMP by referencing or submitting:

- ❑ A final stormwater management approval notice issued by DDOE; or
- ❑ Designs;
- ❑ Technical specifications; and
- ❑ Calculations of stormwater retention volumes.

REQUIREMENTS FOR THE BEST MANAGEMENT PRACTICE

- ❑ Be fully installed and functioning;
- ❑ Retain or infiltrate stormwater runoff;
- ❑ Comply with all applicable construction codes;
- ❑ Be properly sized and located on the property;
- ❑ Designed and functioning in accordance with applicable industry and professional standards and specifications in effect at the time of installation and DDOE's Stormwater Management Guidebook; and
- ❑ Be subject to an inspection by DDOE.

DISCOUNT PERIOD AND RECERTIFICATION

Discount Period: The discount is valid for three years beginning on the approval date; until the property or retention practice is no longer eligible for the discount; or the property is sold or transferred to new ownership.

New ownership: New owners can direct DDOE to use the technical application from a previously filed application in support of the new discount.

Billing: Discount will be applied as a recurring credit to the stormwater fee and begin to accrue with the billing period that follows DDOE's receipt of a complete application.

Recertification application: The customer must reapply to DDOE to extend discount beyond initial three-year term. DDOE must receive the application 60 days before the expiration date of the current discount period. DDOE may deny or approve an additional discount period in whole or in part.

No cap on number of renewals: Discount can be recertified multiple times.

INSPECTIONS

DDOE may inspect a property in the following circumstances:

Application/Recertification application: Determine whether the stormwater retention practice retains the stormwater runoff volume described in the application or previously approved discount.

Continued Eligibility: Maintain qualifying BMP and allow DDOE access to property for inspection.

Accessing property: DDOE will seek permission from the owner or the owner's agent, including:

- Customer identified in DC Water's records:
- Tenant; or
- Property Manager.

Failure to provide access: The refusal or knowing failure to provide DDOE with access to inspect the BMP will be grounds for denial or revocation of the discount, effective the date of the unsuccessful inspection attempt.

CALCULATING THE DISCOUNT

Step 1: Determine, in gallons, the maximum volume of stormwater runoff retained by the eligible Best Management Practice during a one and two tenths inch (1.2 in.) rainfall event.

Ex. 10, 362 gallons retention capacity

Step 2: Divide the step 1 result by seven hundred ten and seventy-five hundredths gallons (710.75 gal.) per ERU (the number of gallons of stormwater runoff per ERU that would be generated by a one and two tenths inch (1.2 in.) rainfall event).

$$10,362 / 710.75 / \text{ERU} = 14.6 \text{ ERUs}$$

Step 3: Multiply the step 2 result by the maximum allowable discount --- 55%.

$$14.6 \times 55\% = 8 \text{ ERUs}$$

Step 4: Multiply the step 3 result by the stormwater fee charge of \$2.67/ERU.

$$8 \times \$2.67 = \$21.36 / \text{Stormwater Fee Discount}$$

STORMWATER FEE DISCOUNT: DENIAL, REVOCATION, ADJUSTMENTS TO DISCOUNT CHALLENGING DDOE'S DISCOUNT DETERMINATION

DDOE's authority:

- Deny an application in whole or in part; and
- Reduce or revoke a discount for a BMP's nonperformance or failure to retain the stormwater runoff volume for which the discount was approved.

Written notification to customer. DDOE may deny or approve an additional discount period in whole or in part. The notice may include a statement of:

- Each deficiency;
- Corrective action necessary
- Deadline, if any;
- Proposed denial, reduction, or revocation of a discount;
- Requirement, if any, for an inspection or re-inspection; and
- Customer's right to appeal.

DDOE can extend the time period for corrective action for good cause shown.

Challenging DDOE'S Determination

- Proposed rules provide for an administrative process through the District's Office of Administrative Hearings for customers seeking to challenge, for example, DDOE's stormwater fee discount calculation.

CONGRATULATIONS! YOUR APPLICATION IS APPROVED!

Once the application is approved, the discount will be applied to the stormwater fee charge on the DC Water bill.

Photo: Blake Real Estate, 1425 K Street, NW. The 3,500 square foot garden includes over 10,000 plants.

SHERIDAN STATION

WCSMITH

The property was the first LEED Platinum multifamily apartment building in DC. It includes a 6,000 square foot vegetative green roof on the multifamily building as a place for residents to relax. All roof drains and gutters feed directly into a 3,000 gallon rainwater collection system, allowing the water to be re-used for irrigation.

2 M Street, NE

WCSMITH

- ❑ New construction. 314-unit multifamily residential building.
- ❑ The site will capture and harvest the first ½ inch of rainfall in a 24 hour period in a cistern.
- ❑ The project will include installing water conserving plumbing fixtures.
- ❑ Project will be irrigated with collected rain water from the cistern. No potable water will be used for irrigation.
- ❑ Provide positive drainage from the building and water management for all windows, walls, roofing, and foundations.

ADDITIONAL INFORMATION

DDOE STORMWATER FEE AND DISCOUNT PROGRAM

General Overview of Stormwater Fee: For additional information please visit the following link: [District Stormwater Fee and Stormwater Fee Discount Program.](#)

Calculating the stormwater fee for a commercial property:

1. Amount of impervious area at a property/1000 Square feet (1 ERU) = X
2. Multiply X by \$2.67 = Stormwater fee
3. Examples: Buildings with 10,000 and 50,300 square feet of impervious surface area.

Building A: $10,000/1000 = 10 \times \$2.67 = \$26.70/\text{month}$ stormwater fee

Building B: $50,300/1000 = 50.3 \times \$2.67 = \$134.30/\text{month}$ stormwater fee
